

Media Broadcast Satellite appoints Greg Browning to further strengthen U.S. business

Browning set to serve as company's Senior Vice President of Business Development for North America

Usingen, Germany, 15 March 2018: – Media Broadcast Satellite (MBS) has announced that it has selected experienced satellite executive, Greg Browning, to serve as SVP of US Accounts. He brings a wealth of market knowledge to the company, including over 25 years working with the U.S. Government. Greg is a notable global business builder with a thirty-year successful track record in executive positions with extensive international reach in technology and service enterprises; including general management, sales, marketing, business development, strategic alliances, business/operating units and regional programme management.

In his new role, Browning will be directly responsible for expanding existing U.S. Government services as well as focusing on traditional broadcasting opportunities both to and from the European Markets. Browning's comprehensive knowledge of the U.S. market and his understanding of very unique government requirements, will enable him to serve MBS' customers in-country and to be highly responsive to their needs.

"We are thrilled to welcome Greg into the MBS family. His track record in the industry will be invaluable in enabling MBS to expand further into this key market," said Sven Sünberg, Managing Director, MBS. "We require someone who can truly drive the business forward in this dynamic region. Greg's vast experience in the market makes him the perfect choice to better serve MBS' customers across the U.S. market."

About Media Broadcast Satellite

As the operator of Germany's largest teleport and one of the world's largest teleports, Media Broadcast Satellite has been implementing and operating successful communications solutions for globally active customers since the 1970's. Through its own teleport in Usingen near Frankfurt, Media Broadcast Satellite offers tailor-made solutions for the areas of broadcast, data, teleport and data centres. Satellites between 76° East and 60° West can be reached through more than 135 antennas in the Ku-, Ka- and C-Band. To ensure a maximum of security and stability of our solutions, Media Broadcast Satellite operates a NOC manned 24 hours per day on 365 days of the year and a fully redundant RF, IT and power supply infrastructure. The high-quality standard of the services "Made in Usingen/Germany" is underlined by relevant certifications such as ISO27001 IT & data security as well as our own engineering team supporting our customers in all stages of transmission, distribution and service management. Media Broadcast Satellite's range of services includes both standard communication services and complete managed service solutions for DTH platforms (SD/HD), data networks and teleport co-location/gateways.
