

Media Broadcast Satellite concludes long term agreement with NorthTelecom for teleport-, housing- and infrastructure-services

Usingen, September 13, 2017 – Media Broadcast Satellite, the leading provider of broadcast satellite services and operator of one of the world's largest teleports, extends its business in teleport-, housing- and infrastructure-services and concludes an agreement with NorthTelecom. The agreement will enable NorthTelecom to operate at the teleport in Usingen. This was announced by both companies previously to the upcoming IBC 2017 in Amsterdam, where Media Broadcast Satellite will exhibit at stand 1.B79. NorthTelecom is a leading global satellite service provider, that provides satellite communications and ICT services both on land and at sea.

The long-term agreement covers infrastructure services for NorthTelecom to set-up a co-located teleport for data and broadcasting at Usingen combined with rack, housing and office space. NorthTelecom has chosen Media Broadcast Satellite's engineering and expertise including monitoring and maintenance services to ensure smooth operation. The agreement also includes a redundant fibre connectivity for high availability. Furthermore, both companies will benefit from the mutually shared use of their operational antenna infrastructure and technology know-how at teleport Usingen.

"We are pleased to extend our teleport and housing services agreement with NorthTelecom and continue providing them the perfect infrastructure to operate fully from Usingen" said Christian Fleischhauer, Managing Director of Media Broadcast Satellite GmbH, at the announcement of the agreement. "High security standards as well as an excellent infrastructure in combination with flexible models of support, will guarantee best conditions for NorthTelecom. The agreement underlines the relevance of teleport Usingen, our outstanding technical standards and triggers new and successful ways of cooperation in the teleport- and broadcast market."

"We are delighted to choose Media Broadcast Satellite GmbH as one of our reliable partners to expand our infrastructure reach globally", said CEO of NorthTelecom, Mr. Hadi Nazari Mehrabi. "This is a great opportunity for both parties and a new concept in the industry. NorthTelecom and Media Broadcast Satellite will share and exchange infrastructure and expertise while expanding their technical and commercial scope. Both companies are committed to a long-lasting cooperation."

About Media Broadcast Satellite

As the operator of one of the world's largest teleports, Media Broadcast Satellite has been implementing and operating successful communications solutions for globally active customers since the 1970's. Through its own teleport in Usingen near Frankfurt, Media Broadcast Satellite offers tailor-made solutions for the areas of broadcast, data, teleport and data centres. Satellites between 76° East and 60° West can be reached through more than 135 antennas in the Ku-, Ka- and C-Band. To ensure a maximum of security and stability of our solutions, Media Broadcast Satellite operates a NOC manned 24 hours per day on 365 days of the year and a fully redundant RF, IT and power supply infrastructure. The high-quality standard of the services "Made in Usingen/Germany" is underlined by relevant certifications such as ISO27001 IT & data security as well as our own engineering team supporting our customers in all stages of transmission, distribution and service management. Media Broadcast Satellite's range of services includes both standard communication services and complete managed service solutions for DTH platforms (SD/HD), data networks and teleport co-location/gateways. Further information is available at www.mb-satellite.com.
